

# Camellias 20% off

More than 100 Varieties! Early & mid-season bloomers for full sun to shade.

Planting: Camellias prefer slightly acidic soil rich in organic material. Mixing in Michigan peat at the time of planting is one of the best things you can do to make sure your new Camellias get off to a good start! For an added boost, mix in some BioTone as well.

## Free Seminar Saturday: "Camellia Selection & Care"

The much beloved Dave Iden will be returning to Esposito's to teach you all about Camellias. He will explain how to choose healthy plants that will meet your specific needs, the proper way to plant them, and how to keep them healthy while maximizing bloom potential.

# Blueberries 3/13<sup>88</sup>
